Color System

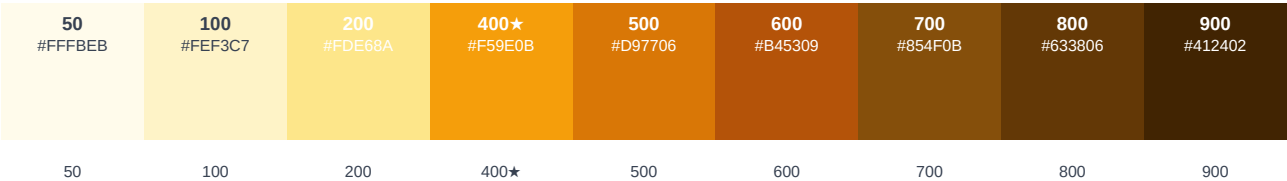

Brand DNA

AiCryptoCore uses three primary color families. Teal anchors trust and security (the shield). Amber/Gold signals value, market movement, and AI intelligence. Navy provides the deep authoritative foundation for news content.

Primary — Teal (Trust & Security)

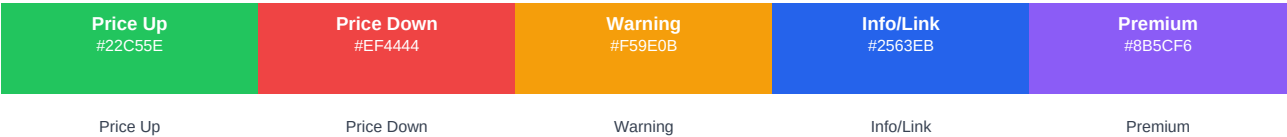

Accent — Amber/Gold (Value & AI)

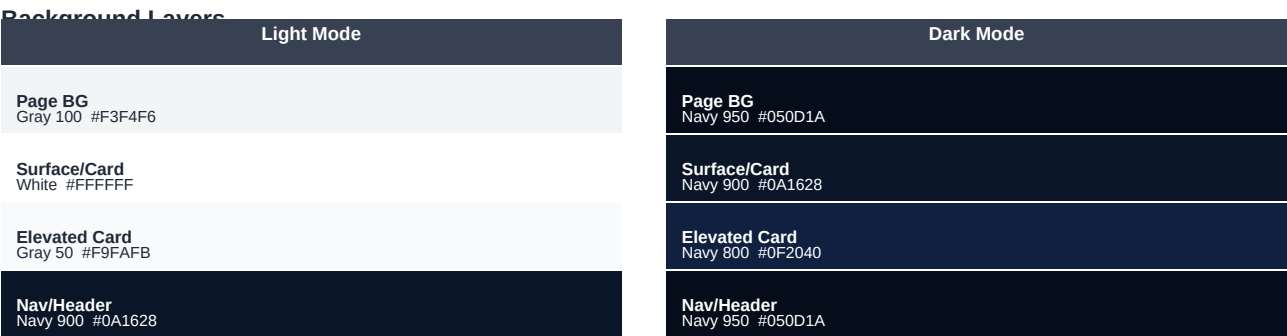

Foundation — Navy & Neutral Gray

Semantic — Status Colors

Light Mode vs Dark Mode Usage

Text Colors

Light Mode	Dark Mode
Primary Text Gray 900 #111827	Primary Text Gray 50 #F9FAFB
Secondary Text Gray 700 #374151	Secondary Text Gray 300 #D1D5DB
Muted/Caption Gray 500 #6B7280	Muted/Caption Gray 400 #9CA3AF
Brand Teal Text Teal 700 #0A6652	Brand Teal Text Teal 400 #2DD4BF
Accent Gold Text Amber 700 #854F0B	Accent Gold Text Amber 400 #F59E0B

WCAG 2.1 Contrast Compliance

Combination	Ratio	AA (4.5:1)	AAA (7:1)
Teal 500 on Navy 950	8.2:1	✓	✓
Amber 400 on Navy 950	9.1:1	✓	✓
White on Navy 900	15.3:1	✓	✓
Gray 900 on White	16.1:1	✓	✓
Teal 700 on Teal 50	7.4:1	✓	✓
Amber 800 on Amber 50	9.3:1	✓	✓
Gray 500 on White (captions)	4.6:1	✓	—

02

Typography System

AiCryptoCore uses a dual-font system: a modern geometric sans-serif for UI and headlines, paired with a high-legibility text face for long-form article body content — matching standards of premium financial news publications.

Font Families

Role	Font Family	Fallback	Usage
Display/H1	Plus Jakarta Sans	Inter, system-ui	Hero headlines, brand marks
Heading H2-H4	Inter	Helvetica Neue, Arial	Section heads, card titles
Body/Article	Lora (serif)	Georgia, serif	Article body, long reads
UI / Labels	Inter	Helvetica Neue, Arial	Nav, tags, metadata, prices
Monospace	JetBrains Mono	Fira Code, Courier New	Wallet addresses, hashes, code

Type Scale (News Article Standard)

Token	Size	Line-height	Weight	Letter-spacing	Usage
display	48px	1.1	700	-0.02em	Homepage hero
h1	36px	1.15	700	-0.01em	Article title
h2	28px	1.2	600	-0.01em	Section header
h3	22px	1.3	600	0	Card title / sub-section
h4	18px	1.35	600	0	Widget title
body-lg	17px	1.75	400	0	Article lead paragraph
body	16px	1.7	400	0	Article body (Lora)
body-sm	14px	1.6	400	0	Secondary text, captions
label	12px	1.4	500	+0.04em	Tags, badges, metadata
caption	11px	1.4	400	+0.02em	Timestamps, photo captions
mono	13px	1.5	400	0	Wallet hash, addresses

Readability Rules

Rule	Value	Reason
Max line length	65–75 characters	Optimal reading comfort (news standard)
Article column	680px max-width	Approx. 70ch at 16px
Min font size	14px	Accessibility threshold
Paragraph spacing	1em (16px)	Clear visual separation between paragraphs
Lead paragraph	body-lg (17px)	First paragraph always larger for emphasis

03

Spacing System

AiCryptoCore uses a base-4 spacing scale. All spacing values are multiples of 4px, ensuring consistent vertical rhythm across news feeds, article layouts, and data widgets.

Base-4 Spacing Scale

Token	px	rem	Usage
space-1	4px	0.25rem	Icon padding, tight inline gaps
space-2	8px	0.5rem	Component internal padding
space-3	12px	0.75rem	Small component gaps
space-4	16px	1rem	Default padding, body paragraph margin
space-5	20px	1.25rem	Card inner padding
space-6	24px	1.5rem	Section internal gap
space-8	32px	2rem	Component-to-component gap
space-10	40px	2.5rem	Section top/bottom padding
space-12	48px	3rem	Major section dividers
space-16	64px	4rem	Hero / page section gap
space-20	80px	5rem	Large layout sections
space-24	96px	6rem	Maximum page section gap

Layout Grid — News Website

Breakpoint	Width	Columns	Gutter	Margin	Use Case
xs	< 480px	4	16px	16px	Mobile single-column news feed
sm	480–767px	4	16px	20px	Mobile landscape / tablet portrait
md	768–1023px	8	24px	24px	Tablet — 2-column article grid
lg	1024–1279px	12	24px	32px	Desktop — 3-column news grid
xl	1280–1535px	12	32px	48px	Wide desktop — full layout
2xl	>= 1536px	12	32px	auto	Ultra-wide — max-width 1440px center

Component-Level Spacing

Component	Padding	Internal Gap	Notes
Nav bar	16px 24px	32px	Logo left, links center/right
News card	20px	12px	Image top, content below
Article header	48px top, 32px H	—	Hero area, large breathing room
Article body	0 (full-width)	16px para	Max 680px centered column
Sidebar widget	20px	16px	Compact widget padding
Price ticker	8px 16px	24px	Tight, data-dense
Category tag	4px 10px	—	Pill, border-radius full

CTA button	12px 24px	—	Primary actions
Footer	48px 32px	24px	Multi-column links

04

Border & Radius System

Border Widths

Token	Value	Usage
border-0	0px	No border — clean surfaces, images
border	1px	Default card borders, inputs, dividers
border-2	2px	Focus rings, active states, featured cards
border-4	4px	Left accent bars on article/quote blocks
border-8	8px	Large decorative accent stripes

Border Colors

Token	Light Mode	Dark Mode	Usage
border-default	#E5E7EB (Gray 200)	#162C55 (Navy 700)	Card, input default border
border-subtle	#F3F4F6 (Gray 100)	#0F2040 (Navy 800)	Dividers inside components
border-strong	#D1D5DB (Gray 300)	#1E3A6E (Navy 600)	Hover, active borders
border-brand	#14B8A6 (Teal 500)	#2DD4BF (Teal 400)	Brand focus, featured item
border-accent	#D97706 (Amber 500)	#F59E0B (Amber 400)	Gold accent highlights
border-danger	#EF4444 (Red 500)	#EF4444 (Red 500)	Error, price down
border-success	#22C55E (Green 500)	#22C55E (Green 500)	Price up, success

Border Radius Scale

Token	Value	Usage
radius-none	0px	Images (full bleed), dividers, hero banners
radius-sm	4px	Tags, small badges, inline chips
radius-md	8px	Buttons, inputs, small cards
radius-lg	12px	News cards, sidebar widgets, modal dialogs
radius-xl	16px	Featured article cards, hero cards
radius-2xl	24px	Large promotional cards, CTA banners
radius-full	9999px	Category pills, avatar circles, ticker badges

Elevation / Shadow Scale

Shadows are used sparingly — only for interactive surfaces that need to indicate depth or hover state. On dark mode, replace shadows with subtle border brightening.

Token	Value (Light)	Usage
shadow-none	none	Flat cards, default state
shadow-xs	0 1px 2px rgba(0,0,0,0.05)	Subtle — price tickers
shadow-sm	0 2px 4px rgba(0,0,0,0.07)	News cards default
shadow-md	0 4px 12px rgba(0,0,0,0.10)	News cards hover state

shadow-lg	0 8px 24px rgba(0,0,0,0.12)	Modals, dropdowns
shadow-brand	0 4px 16px rgba(20,184,166,0.25)	Brand teal glow — CTA hover

Style Decision Guide

If you want...	Choose
Max visual impact, dark-native feel	Style A — Dark Command
Best long-form article readability	Style B — Editorial Light
Strongest brand differentiation	Style C — Midnight Teal
News app with dark nav + readable articles	Style D — Hybrid Split
Warm, premium editorial with gold personality	Style E — Amber Forward

What to add next (recommended)

Once you pick a style, the next step is to build out: (1) Component Library — news card, article header, nav, price ticker, category tag, author badge. (2) Icon System — choose between Tabler Icons or Phosphor Icons for crypto/finance context. (3) Motion & Transition guidelines — hover durations, page transitions for SPA. (4) Data Visualization palette — consistent chart colors for price charts and on-chain data. Reply 'generate component library' to continue.
